Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance: The main reason for allowance of claims 1-8 is that the prior art does not show or make obvious a barycentric position measuring apparatus as shown in claim 1. Applicant claims a barycentric position measuring apparatus comprising a selection switching means which selects and switches a combination of the positive output from the first sensor and the negative output from the second sensor, a combination of the negative output from the second sensor and the positive output from the third sensor, a combination of the positive output from the third sensor and the negative output from the fourth sensor, and a combination of the negative output from the fourth sensor and the positive output from the first sensor. Also, the output difference conversion means determines the output differences of all the combinations selected and switched by the selection switching means. This limitation in combination with other limitations of the claims renders this case allowable.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
